

HƯƠNG VỊ HỘI AN

Lấy cảm hứng từ ẩm thực truyền thống Việt Nam, Bếp trưởng đã tạo nên những phiên bản hiện đại của những hương vị thân thuộc. Thực đơn là hình ảnh phản chiếu những ảnh hưởng văn hóa phong phú từ cảng giao thương cổ xưa tại Hội An, kết hợp những kỹ thuật tân tiến với nguyên liệu địa phương để tạo nên những món ăn sống động theo phương pháp bền vững.

Thực đơn của Namia tôn vinh di sản ẩm thực phong phú của khu vực, đồng thời khuyến khích phong cách ẩm thực bền vững - bằng cách hợp tác chặt chẽ với các nông trại địa phương, chúng tôi chọn lựa nguyên liệu theo mùa, giảm thiểu lãng phí và gắn kết với cộng đồng hơn.

A TASTE OF HOI AN

Inspired by traditional Vietnamese cuisine, our Chef has crafted these dishes as interpretations of the flavours we hold dear. They reflect the rich cultural influences of the ancient trading port in Hoi An where trade and cultural exchange weave international techniques with local produce in a sustainable approach.

Our menus honor the region's rich culinary heritage while embracing sustainability - by working closely with local farmers, we source seasonal ingredients, minimize waste, and engage with the community.

*As the Vietnamese phrase goes:
"Ăn theo thuở, ở theo thời" - Live according to time*

CHAPTER

NAMIA WINE

Our wines have been thoughtfully curated together with a French Sommelier, to offer an exciting wine list that is completely organic and bio-dynamic. The influence of ancient traders on Hoi An, our philosophy of wellbeing and our sustainable approach are reflected throughout.

While some accessible favourites may be known, you will also have an opportunity to discover some unique and distinctive wine offerings.

ORGANIC WINE

Generally referred to as wine made from grapes that were farmed organically, without synthetic pesticides. For some stricter classifications, organic wine refers to wines made from grapes that have also not had any synthetic additions, and often no sulfur added during vinification.

BIODYNAMIC WINE

Typically refers to wines produced using a holistic approach that integrates organic farming principles with specific bio-dynamic practices. Similar to organic wine, these also avoid synthetic pesticides, but beyond that, see the land, vineyard and its product as an inter-connected ecosystem.

Please note that some producers farm organically or bio-dynamically as a process but often without official certifications. Both organic and bio-dynamic wines may still contain sulfates for preservation.

CHAPTER

COFFEE & TEA

It is believed that the coffee plant was first introduced to Vietnam in 1857 by French missionaries. The height of coffee production occurred in the early 20th century as small-scale production increasingly shifted towards commercial plantations. Today, Vietnam has a thriving coffee culture, with over half a million cafes in the country in 2024!
